Detailed Action

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-26 are rejected under 35 USC 102(e) as being anticipated by Moshir et al., (US PG Pub No. 2002/0100036).
3. Regarding claim 1, Moshir teaches a method of configuring a hard copy output engine comprising:
 - receiving an electronic message including configuration data (Moshir, [0124], I.1-2, I.6-17); and
 - configuring the hard copy output engine using the configuration data (Moshir, [0126], I.3-6, I.10-12).
4. Regarding claim 2, Moshir further discloses the method of claim 1, wherein receiving the electronic message comprises receiving an email at the hard copy output engine and wherein configuring comprises configuring the hard copy

output engine via an embedded web server contained in the hard copy output engine using the configuration data (Moshir, [0021], l. 4-8, Fig.2, component 204 embedded in target device, [0063], l.3-5.)

5. Regarding claim 3, Moshir further discloses the method of claim 1, wherein receiving the electronic message comprises receiving an email through a firewall (Moshir, [0021], l. 3-4, l.11-15).
6. Regarding claim 4, Moshir further discloses the method of claim 1, wherein receiving the electronic message comprises:
 - receiving an email through a firewall at a first user station (Moshir, [0052], l.3-5); and
 - forwarding the email to the hard copy output engine (Moshir , [0052], l.12-14).
7. Regarding claim 5, Moshir further discloses the method of claim 1, wherein receiving the electronic message comprises receiving an XML script and configuring includes setting a threshold for an element chosen from a group consisting of: pigmentation material, marking material, number of hours of operation and number of sheets of print media consumed (Moshir, [0086] l.8-12, inventories means many things like others such as, toner, marking material, hours of operation, and no. of sheets, and something used by statistics [like [0081], l.10, [0087], l.7.)
8. Regarding claim 6, Moshir further discloses the method of claim 1, wherein the hard copy output engine is chosen from a group consisting of: facsimile

machines, photocopiers and printers (Moshir, [0049], I.1-3).

9. Regarding claim 7, Moshir further discloses the method of claim 1, wherein the configuration data include data prepared by: determining a make and model for the hard copy output engine; determining a serial number for the hard copy output engine; and determining user thresholds for consumables associated with the hard copy output engine (Moshir, [0024], I. 1-6).
10. Regarding claims 8-13 have similar limitations as claims 1-6. Therefore, Claims 8-13 are rejected for the same reasons set forth in the rejection of claims 1-6.
